

International Outreach:

Since we aspire to inspire other teams and individuals of all aspects of science, technology, and business, we have mentored FIRST teams internationally from Ecuador, Brazil, Israel, and most recently at Nationals the past 2 years, New Zealand. (Or as we lovingly know them as, the "Kiwi's!")

This past year, a number of Team Fusion students were taken to Germany on a cultural and technological exchange. We visited a German state and now fund robotics development in Berlin. German students are also now working on part of the website for our team.
